

Chalet Font Installation

If you are using a third-party font management program such as Suitcase, Font Reserve or ATM Deluxe, follow the font installation instructions that came with that software.

MACINTOSH POSTSCRIPT INSTRUCTIONS

Double click on the Chalet Installer Icon and follow the prompts. This will copy the fonts onto your hard drive. Make sure you don't have any applications open and that your System Folder is closed. Drag the bitmap file (the little suitcase) and the printer font file (the thing with the House logo on it) of the fonts you wish to install and drop them on top of your System Folder. Your Mac will tell you that it would like to put these in certain places; click on OK. The Macintosh System stores all of your font files in a folder called "Fonts" inside your System Folder.

WINDOWS TRUETYPE INSTRUCTIONS

Double click on the Chalet Installer Icon and follow the prompts. This will copy the fonts onto your hard drive. Double click on the "Main" icon, then double click on the "Control Panel" icon. Find the "Fonts" icon and double click on it. In the "Fonts" window, go to the "File" menu and select "Install New Font." In the "Drive" window, find the disk and directory that holds your fonts. Your fonts will appear in the "List of Fonts" menu. Click on the Chalet font names you wish to install, then click on OK.

If you have any questions call House Industries Tech Support at 302-888-1218 or email tech@houseind.com.

Chalet Silhouette Reference

Chalet Silhouettes are supplied as separate vector line art files in eps format. They can be opened and edited in programs such as Adobe Illustrator, Macromedia Freehand, and Corel Draw. They can also be placed as eps artwork in page layout programs such as Quark and Adobe InDesign. We've supplied the files in this format to make sure that the line art maintains the integrity of the curves.
